

## **Partition ALglass**

Transparency and minimalism – two words carrying the entire concept that underlies the partition ALglass.

The transparency of 10mm laminated glass, joined by bits of transparent PVC, associated to aluminium profiles surrounding it, give this 32mm partition an extraordinary lightness.

The partition ALglass practically eliminates barriers between people, promoting greater interaction among the various elements that form the organizations.

Structure designed to allow multiple configurations, including the incorporation of furniture, and may also integrate coatings of CF Texturas<sup>®</sup> and Acústica XXI<sup>®</sup> wooden panels, as well PVC screens. These finishing options provide spaces with multiple partitions with different acoustic insulation, sharing however a common finishing.

10mm tempered glass gliding doors accompanying the height of the partition up to 3 metres.

It is possible to incorporate wooden matt or semi-glassed gliding doors and wooden or glass sliding doors.

Locks and flap hinges according to market availability.

All profiles are in aluminium alloy ENAW - 6060 (AL Mg Si) according to standards EN 573-3 and EN 755-2.
